PATTERNS OF CHAOS

ILL-STUDIO and SLAM JAM

Introduction by Gabriele Monti

PATTERNS OF CHAOS explores a new perspective on underlying patterns that structure creative ideas in the apparent randomness of chaotic systems. The open session will feature a presentation by ILL-STUDIO and SLAM JAM on their encyclopaedic programme ADDPMP, a series of conversations and screenings on visual language, remix culture and archival science in fashion, art, music and architecture. The open session will allow visitors and students to reimagine a reality in which ideas get to be random, chaotic connections are celebrated, knowledge can be intuitive and humanity stays real.
