Horizon Europe, the ninth European Research and Innovation Framework programme (2021-2027), is one of the key instruments of the Union to steer and accelerate Europe's recovery, preparedness and resilience. In the context of a new European Research Area for research and innovation2, it will strengthen our knowledge base through frontier research, spur breakthrough innovation and support the development and demonstration of innovative solutions, and it will help restore our industrial leadership and open strategic autonomy

CLUSTER 6 (Food, Bioeconomy, Natural Resources, Agriculture and Environment) will help better understand and seize the climate mitigation and adaptation potential of ecosystems and primary production systems including through maintaining and further increasing natural carbon sinks as well as monitoring and environmental observations. The cluster will support a circular, zero-carbon industry as well as nature-based innovations to provide sustainable and climate-smart agriculture and forestry as well as a circular climate neutral, sustainable bio-based industry that provides bio-based materials and products with low ecological footprint

Through the programme, special attention will be given to ensuring vibrant cooperation between universities, scientific communities and industry, including small and medium enterprises, and citizens and their representatives, in order to bridge gaps between territories, generations and regional cultures, especially caring for the needs of the young in shaping Europe's future. Our efforts should be multiplied at international level. The integrated approach to systemic transitions will reinforce the EU's efforts in promoting multilateralism and dialogue on the United Nations Sustainable Development Goals

PROMOTING AN OPEN STRATEGIC AUTONOMY BY LEADING THE DEVELOPMENT OF KEY DIGITAL, ENABLING AND EMERGING TECHNOLOGIES, SECTORS AND VALUE CHAINS to accelerate and steer the digital and green transitions through human-centred technologies and innovations. The COVID-19 pandemic and its consequences for our lives and economies have highlighted the importance of digitalisation across all areas of EU society and economy. New technologies have kept our businesses and public services running and our family and social bonds flowing

3. Che cos'è una PEC

Leggere a voce alta e tradurre in italiano:

In recent years we have had to come up with answers to challenges that tested the core values and principles of the EU as a community. Economic crises, increased global competition, climate change and environmental threats have pushed our understanding of what binds us together as Europeans and made clearer the boundaries of the world around us. The COVID-19-pandemic has been the latest test and in many ways the biggest one yet. It has strained our healthcare and welfare systems and has shaken our societies and economies and our ways of living and working together.

In order to reflect the need to accelerate these transitions following the COVID-19 pandemic, the degree of investment will be considerably increased compared to the current programming period and proportionate to the level of ambition of the Commission within these areas. The EU Member States, European Economic Area (EEA)4 Countries and the European Parliament, as well as stakeholders and interested citizens, all made a collective effort to design it. Defining objectives together has created a sound foundation for the work to follow.

CLUSTER 3 (Civil security for society) will contribute to establishing, deploying and stewarding resilient critical digital and physical infrastructure, both private and public. Strengthened European cybersecurity industrial capacities and the uptake of architectural principles of 'security-by-design' and 'privacy-by-design' in digital technologies will create increased open strategic autonomy and competitive edge and leadership in global markets vis-à-vis foreign technologies. Another expected contribution will be to defend the EUs high standards concerning the right to privacy, protection of personal data, and the protection of other fundamental rights in the digital age on the global stage.

MAKING EUROPE THE FIRST DIGITALLY ENABLED CIRCULAR, CLIMATE-NEUTRAL AND SUSTAINABLE ECONOMY through the transformation of its mobility, energy, construction and production systems. The European Union has the ambition to substantially reduce greenhouse gas emissions by 2030 and to become climate neutral by 2050 and turn into a more sustainable bio-based, climate-neutral, circular, non-toxic and competitive economy. This requires unprecedented changes in the way we produce, trade, build, move around and consume, which will spur our technological, economic and societal transformation and contribute to a green recovery.

RESTORING EUROPE'S ECOSYSTEMS AND BIODIVERSITY, AND MANAGING SUSTAINABLY NATURAL RESOURCES to ensure food security and a clean and healthy environment. Human activities create pressures on natural resources that go far beyond sustainable levels, affecting ecosystems and their capacity to provide multiple services for human wellbeing. Natural resources are further degraded because of the impacts of climate change. Agriculture, forestry, aquaculture and fisheries, food and bio-based systems are of particular concern.
