

SELECTED TOPICS IN COMPUTATIO- NAL MECHANICS

Computational Limit Analysis of Masonry Structures & Introduction to the Virtual Element Method

26 and 27.9.17
Terese
room G

Andrea Chiozzi

Università degli Studi di Ferrara

26th September

h 10.30 > 13

Basic concepts of limit analysis theory

h 14 > 16.30

Limit analysis of masonry structures: numerical strategies and applications

27th September

h 10.30 > 13

The virtual element method: an introduction

h 14 > 16.30

The virtual element method: recent formulations for structural problems
