DANIEL V. OLIVEIRA

Associate Professor

Daniel V. Oliveira, Civil Engineer (1993) and Master in Civil Engineering Structures (1996) by University of Porto, concluded his PhD in 2003, at University of Minho, on the cyclic behavior of blocky masonry structures. He is currently a staff member of the Civil Engineering Department of University of Minho.

His main research interests include experimental and numerical approaches about the rehabilitation of historic masonry structures, earthquake engineering, use of composite materials and earthen construction. He is author of several publications, in both conferences and in journals, on those topics.

He is supervisor of several MSc and PhD students and acts as reviewer of several ISI journals.
