

LABORATORY FOR SURVIVAL

Innovation and resilience through bio-artefacts and circular design

9.6.2023
Cotonificio
aula G
9 am

The conference highlights the necessary transition to sustainability and resilience—advocating for new creative and cultural approaches to urban change and working with nature. We claim that complex territorial as well as natural dynamics can be understood and re-directed in a Laboratory for Survival. Bio-artifacts and Circular Design are brought forward in this international exchange between Interactive Design (Iuav) and Territorial Design (LUH)

curated by **Raffaella Fagnoni** Iuav and **Jörg Schröder** LUH
