

Chiara Scanagatta

Citizens' Participation in Urban Transformations

RES

Ronzani Edizioni Scientifiche

Chiara Scanagatta

Citizens' Participation in Urban Transformations

Ronzani Edizioni Scientifiche

Index

11 Preface

17 Introduction

About the Book

Fields of research and research questions

Application through the LOOPER project

Structure of the Book

Part I

Theoretical Framework and Technologies for Urban Transformations

31 City Challenges and Urban Transformations

Sustainable and liveable cities

EU approach to urban challenges

Urban context and social issues

41 Participatory Approach

State of the art

Discussions about participatory

Bottom-up approach to implement participatory approach

53 Co-design

What is co-design

The evolution of co-design

Co-design examples

63 Urban Living Labs

What is a Living Lab

From Living Lab to Urban Living Lab

Discussions about Urban Living Labs

Urban Living Lab examples

79 The Learning Loop

What is the learning loop

The evolution of the learning loop

Part II

The Co-Creation Methodology

- 89 **Overview and Considerations**
 - Methodological approach
 - Tools and methods of the co-creation methodology
 - Research target groups and stakeholders
- 97 **From Co-Design to Co-Creation**
 - The empowerment of the bottom level
- 103 **The Co-Creation Methodology**
 - Identification of problems
 - Co-design and evaluation of alternative solutions
 - Implementation and monitoring
- 115 **The Learning Loop to improve Co-creation**

Part III

Sensing, Collection, And Visualization Technologies

- 119 **Technologies**
- 121 **Sensors**
 - Types of sensors
 - How to build sensors
- 135 **Digital Tools**
 - Types of digital tools
 - Data visualization and User Interface design

Part IV

The Verona Case Study

- 135 **The Application of the Co-Creation Methodology**
- 145 **The Verona Living Lab**
 - First loop: identification of problems
 - First loop: co-design and evaluation of alternative solutions
 - First loop: implementation and monitoring
 - Second loop: co-design and evaluation of alternative solutions
 - Second loop: implementation and monitoring

Part V
Critical Reflection
on the Co-Creation Methodology

175 How the Learning Loop worked

The utility of the two loops
Different learning levels activated inside the learning loop process

183 The perception Issue

The knowledge base scenario
Real situation vs. perceived situation
Trustfulness towards collected data
Conflicts with policymakers

195 How Technologies helped the Co-Creation Methodology

Participation and data collection
Participation and visualisation dashboard
Participation and co-design tools

197 Bottom Level Absence and its influence on the Co-Creation Process

Part VI
Limits and possible Improvements

201 Reflection on Technologies

Low-cost vs. official sensors
Data visualisation and collection platform design

225 Limits of the Methodology

Discussion on the methodology
Sensors outcomes

233 Possible Improvements to the Methodology

237 Conclusions

241 Glossary

249 References
