Venetian cultural networks and activists present to international partners the art of dwelling in an evolving city. Talks by **Alice Ongaro Sartori** [wetlands], **Remi Wacogne** [Ocio], **Matteo Stocco** [Metagoon] curated by **Mario Ciaramitaro** [Capacity2Transform].

wetlands is an editorial project dedicated to the themes of social and environmental sustainability and the challenges of the Anthropocene.

OCIO, Osservatorio Clvico sulla casa e la residenza – Venezia, is a collective of residents and researchers interested in housing and residential issues in insular Venice.

Metagoon seeks to cast a light on the knowledge, traditions, transformations, and contradictions of the lagoon ecosystem, creating a map in which borders are outlined by interviews, stories and silent observations
