

WOVEN FUTURE

Innovation, Vision, and Sustainability in an Evolving Textile Industry

Fabio Adami Dalla Val

Exhibition Manager Denim Première Vision / M&A Advisor

Seminar organised and introduced by **Lucia Rosin**, in the context of Fashion Material Design Studio.

Fabio is a marketing and communication professional with a deep background in the fashion and textile world. Originally from Veneto, he's built his career by combining creativity, strategy, and a sharp eye for what's next – turning ideas into real projects with global impact. His work focuses on building brand value, managing resources smartly, and understanding how different markets and audiences move. What makes him stand out is his ability to connect design, craftsmanship, and technology – three worlds that, when they meet, can truly shape the future of fashion.

Today, he works on international fashion events such as Denim Première Vision, and writes about sustainability, new trends, and the conversation between art and fashion.
