

Design sprint workshop:

Architecture for Adaptation: Designing Resilient Futures in the Lagoon

Explore how architecture and spatial design can respond to climate adaptation challenges.

Why join?

- Join a hands-on design sprint on architecture and climate adaptation
- Work collaboratively on real design challenges with students from different disciplines
- Certificate of participation from UNDP
- Networking with UN professionals and experts
- Guaranteed participation in a follow-up global UNDP event in October, bringing together young innovators from around the world
