TERRAIN LAB GEOBODIES TRAJECTORY #2 - LIMINAL LANDS

Spatialising the Rights of Nature

**12.7.2026
Badoer
aula T1
9.30 am**

Terrain Lab 2026 continues its exploration of the Venice Lagoon, one of the world's most fragile intertidal ecosystems, shaped through centuries of environmental transformation and human intervention. This edition engages with the concept of Rights of Nature, positioning the workshop as a platform to explore how emerging ecological and legal frameworks, the evolving Declaration of the Rights of the Venice Lagoon, can be spatialised, interpreted, and critically developed through design. The workshop is developed in collaboration with Università Luav di Venezia and TU Delft, fostering a shared platform for research, experimentation and cross-disciplinary exchanges.
