

UPTECH Call for Entrepreneurs and Startups

Deep Tech Startup Incubation and Support Program

Are you building a deep tech startup?

The UPTECH project is launching a call to identify and support entrepreneurs and startups developing deep tech solutions in Artificial Intelligence, Big Data, Cybersecurity and Internet of Things, through mentoring, business development support and access to funding opportunities.

What is UPTECH?

UPTECH is a European project designed to strengthen innovation and entrepreneurship capacities in Southern Europe by connecting higher education institutions, innovation hubs, foundations, research actors and business ecosystems.

WHO ARE WE LOOKING FOR?

Entrepreneurs, startups, student teams, academic teams or research-based projects, including individuals or teams that have not yet formally formed a startup, with:

- ➔ **Innovative deep tech solution**
- ➔ **Market potential**
- ➔ **Interest in startup creation, growth or commercialization**

Priority will be given to initiatives with clear market potential and the capacity to contribute to UPTECH's startup and innovation objectives.

PROGRAM BENEFITS

- ✓ **Monthly sessions of mentoring and training**
- ✓ **Business development support**
- ✓ **Market-readiness guidance**
- ✓ **Networking opportunities**
- ✓ **Visibility within the UPTECH ecosystem**
- ✓ **Access to deep tech events and pitching opportunities**

EXPECTED RESULTS

Through this programme, UPTECH aims to support the development of market-oriented deep tech startups and innovations, and contribute to the creation or support of:

- **Innovative products with IPR potential**
- **New startups**
- **Innovations launched to the market**
- **Startups with initial sales or financial transactions**
