

EXERCISING CLIMATE RELATIONALITY

seminar by **Giulia Ciola**

23.11.2026
Magazzino 6
aule 1.1, 1.3
10.30 am

The ecological relationality between bodies, fashion and climates becomes a tool for cultivating attunement in Giulia Ciola's PhD research. Through Atmospheric Fashion Exercises, she challenges established design logics rooted in dualistic perspectives, redirecting attention towards the dressed body as situated within its environment. Drawing on the relational framework of atmosphere, she invites participants to explore how to design for and imagine future climates.

In the frame of the Critical Fashion Practices course / **Clizia Moradei**
