

CLIMATE CHANGE AND CITIES

Flood risk and resilience

31.10.2024
online
10.30 am

In the context of the Interreg IPA-Adriion NATURED project, a series of transnational seminars is organized to share information, exchange knowledge, and build capacity on the complex interactions between climate (change) and cities, in particular on how the structure and composition of the urban environment profoundly influences the local microclimate. This second transnational seminar especially focuses on flood risk and resilience in cities and beyond, covering aspects related to various types of flood (e.g., river, urban drainage) and nature-based solutions to prevent/alleviate the flood impacts.

invited speakers:

Vittore Negretto Università Iuav di Venezia

Giovanni Vicentini Municipality of Padua

Antonija Vučić Regional Development Agency of Karlovac County

Karla Željko, Senior expert AcquaGuard project, Karlovac County
